

How to Bubble Creatures

Best to do outside!

- Begin by cutting the bottom end off your sock (white socks are the best!) and cutting the top off your plastic bottle off (a job for the adults!).

- Place the sock over the bottle top (be careful of sharp plastic edges, pull tight and tie a hair bobble or elastic band around the top to hold in place, put to one side.

Time to make up your paint, mix water and washing up liquid to make a bubble solution in a bowl then mix in your chosen paint colour, about 2 spoonfuls per 3 spoonfuls of water.

- Dip in your bubble maker (the socked bottle top).

- Blow bubbles directly onto a piece of paper!

Once the paper is printed with lovely bubbles, leave to dry then add on your eyes, teeth, horns whatever to make your tree creature!
