

Rainbow Village by Amanda Jane Ogden

Instruction 17: The street

To see the video click [here](#)

You will need:

- Glue
- Glue spreader
- All the buildings you have made

What to do:

1. Today you need to make a final decision on where all the buildings should go!
2. You drew round them yesterday, so if you are happy with that lay-out, put all the buildings out on your table in order.
3. Take the first building and glue its base to the box and its side to the side of the box.
4. Hold it firmly in place until the glue is set.
5. Take the next building and glue its base to the box and its side to the first building.
6. Continue like this until your street is complete. Take time to let the glue dry after each step.

It might look a bit like this:
